Dear Mr. President:

In this critical period in the history of the United States and the world, there are people criticizing you through propaganda. Some of them may do so knowingly and unknowingly not for the sake of humanitarian reasons and not for prosperity of the people but for satisfaction of their own mind and ideas. Their ideas are their idols and they are slaves of their ideas. Their ideas and idols may have been based on many factors. These factors include the level of their awareness, value judgement, mistakes certainties even hidden feelings of selfishness, revenge, greed, hatred, jealousy, anger, superstition and fear, the emotions that have destroyed many lives and will lead many more to misery and unhappiness. These people may be right in their own mind but right only up to the level of their awareness. We should realize that "it is a changing world", It is necessary to update and improve our ideas harmonically toward a more appropriate goal. Instead of following fundamentalistic ideas ignorantly and superstitiously we should choose and actively support the goals that harmonically leads to the happiness and health of the entire human beings in a proper and fair manner.

Dear Mr. President, the world should be a very orderly place. All forces and motion in it can be regulated by a few simple rules or laws. These rules when fully understood explain and tie together many apparently unrelated things. For achieving the goal of hap-

piness and health of the human being, I/we can summarize the formula in a small book, in such a way that everybody can understand, feel and follow, while nobody get hurt or suffer much pain. We do have the mean to acheive the goal, these means include proper education and proper communication. During our march toward the goal, we learn to be free, we learn about the realities and we learn to be strong enough to accept them happily and faithfully. We learn to put away all pretense and meet each other face to face without self-pity and without prejudice, will learn to put into action our better impulses straight forward and unafraid. We will learn to be large in thought, in word and in deed. We will learn to be happy and healthy and make the others happy and healthy.

Creation of a relative health, happiness and peace on earth will stimulate creation of synergetic circles for evolution and promotion of systems which are necessary to create further advancement of sciences, arts, technology, education and other beneficiary phenomenon. These circles will lead human being to further health happiness and peace. Then more cycles for evolution of peace will start and continue until human being reach the ultimate pleasure and health together with love, faith, desire, enthusiasm and hope, free from any negative emotion. These will secure the lasting pleasure.

Dear Mr. President, I have been working on a splendid idea that I believe will lead the world to a realistic peace, health and happiness. I have had significant inspiration from you for this
