Mikhail Sergeevich Gorbachev
Communist Party of the Soviet Union
Staraya pl. 4
Moscow, U.S.S.R.

Dear Mr. Gorbachev,

In view of special respect and admiration that I have for you and for the great people of the Soviet Union, as well as the Communist regime, I am happy to send you copies of the letter that I have written to the President of the United States of America, and the letter that I have sent to Ayatollah Rouhollah Khomeini. These letters contain the conclusion of the theory that I have developed following an unusual experience I had on July 3, 1986. This theory, I believe, will lead human beings toward peace, prosperity, and health throughout the world regardless of their religious beliefs and their present conditions.

I was swimming in the ocean at the north-west part of Florida in the morning of July 3, 1986, when I was inspired directly by God. He chose me as his son, and permitted me to be close to him. This inspiration was through an association of my intuition, and some conscious senses including sound. It was real, powerful, and honest. This experience for me, who had no previous religious training and religious beliefs, became extremely exciting, stimulating, and enlightening. It put me under constant emotional pressure, and pressure of thoughts. I developed my theory following extensive study of many books including scientific, psychological,

and religious ones. I also obtained ideas from many people of the world. Even though my theory is now complete, it would be flexible for further evolution and improvement through feedback.

My theory will lead the world toward peace and happiness. It will eliminate hostilities, hatred, stupidities, biases, and prejudices that have perpetuated from generation to generation. It will eliminate superstitions, including many of those which have overwhelmed the real spirit of some religions. Instead, it will enlighten these religions with the light of other sciences, as they need, making them pure, sincere, and compatible with each other and with the human needs, so constructive and healthy competitions will replace hatred and animosities.

My theory cultivates honesty, sincerity, and love, together with my non-accumulated perception of faith, and cooperation among the people. Also, it will modify selfishness, jealousy, anger, and ill-expressed feelings of revenge and greed. When we achieve peace in the world, and discipline ourselves and others morally, in a fair manner with proper understanding, there will be synergetic promotion and evolution of the other sciences, such as technology, agriculture, medicine, art, the housing industry, and others, that will spread further peace and happiness for more people of the world. Proper education, communication, and understanding will abolish selfishness, prejudice, and other evils that tend to lead us toward war and misery. Also, it teaches us that we can trust each other, and work together to enjoy modern technology and real security, and to solve human problems, including those which are from civilization itself.

Honest and positive thoughts release creative power. Our actions will follow, and will be in harmony with positive, constructive and optimistic thoughts. We will be able to release the kinetic energy of human beings to function toward Utopia. Our desire to create peace indicates that we have the means and channels to achieve it. We can make it become reality. Peace and prosperity will capture the world.

My theory is a new theory of life. It will prove that life should have meaning, purposes, and real value. It will explain how and why the universe was created.

If we understand my theory, we will feel close to each other, we will feel close to God, we will become close to understanding God, and we will believe in God. If we understand my theory, our functions will be towards the happiness of others, we will find our happiness through the happiness of others, and we will find inner peace and inner happiness.

My theory will eliminate fear of death, fear of old age, and fear of poverty. It will eliminate poverty, insecurity, loneliness, and helplessness in the world.

Mr. Gorbachev, I would like to direct your attention toward the practical way of making peace in the world. Under the present situation, I believe there is only one solution; that is the following:

You and the President of the United States, in other words, the Government of the Soviet Union and the Government of the United States of America should listen to me, and trust me, either publicly or privately, as I listen to you and trust you openly. If so, most of the governments of many other nations will join us after they realize our sincere

honesty, and integrity. On the other hand, I choose my views from yours, and the President of the United States and many other intellectuals of the world, modifying these views and blending them into what God desires and is willing to achieve. These views will be certainly those that you and the majority of the intellectuals will be in agreement with, even though some may not believe in God yet. Perhaps the decisions may be made through activity of a "Congress of the World" consisting of well-known spiritual, scientific, psychological and humanitarian leaders. In such a congress, the minorities and even some politicians may be involved, so there will be a mutual understanding, cooperation, sharing, and trust between all of us. This cooperative energy will be directed toward making peace and prosperity for all the people of the world harmoniously as God wants it. Peace and prosperity should capture the world and it will, even though some people may not understand and believe my theory yet.

Mr. Gorbachev, I hope I will hear from you soon. My next plan in this matter may vary widely, and depends on the result of many evolving events including your response and the response of the President of the United States.

Sincerely yours,

Hormoz Mohtashemi, M.D.
