Dear Editor:

Respectfully I enclose copies of some my writings (letters), in regard to the inspiration that I had from God on July 3, 1986, and those in regards to my theories. Please be advised that the enclosed materials are not for publication or propaganda, but are for information, understanding and ultimately growth.

I believe they are to become important issues for future debates. I hope the results will be beneficial for progression of humanity and promotion of power of understanding to acquire faith and healing, ( ایمان و شفا ).

My inspiration from God was a real and true inspiration which was clearly tangible for me. My theories are new theories of creation, theories of life, existence and evolution. New theories of life and love as well as God and his mind..

The basis of the theories speak to the evolution of many schools of thought, such as philosophy, psychology, religion, modern mythology and others. They also address their respective potential power for leading humanity to happiness, health and harmony.

Please feel free to contact me if necessary.

Sincerely yours,

Hormoz Mohtashemi, M.D.
