Jacob E. Stump, M.D.
28540 Spring Road
Kennedyville, MD. 21645

September 19, 2000

Dear Dr. Stump:

While I was reviewing some of my files I came across a letter from you that was your response to the documents I had submitted to you in December of 1997. (A copy of your letter is enclosed). The events also brought to my mind the memory of many hours of conversations we had during the years 1984 to 1987.

I would like to express my sincere thanks and honest appreciation for all your efforts and support for me and my positions in those years. Your support gave me the strength and opportunity to continue to struggle and function in spite of all the hardships and vicissitudes that I was enduring. Also I frequently felt at peace with myself as the result of the therapy I had in your office in Tenafly, New Jersey during those years. I do wish you a lot of happiness and peace for years to come.

Along with this letter I am enclosing a condensed hand made booklet which contains the summary of parts of my theories. As you will notice the item number 28 of my theories explains the new modern progressive, intellectually advanced and scientifically explainable and understandable religion, which is gifted to the world by God in the beginning of Y2K. (See my letter to President Clinton dated 12/20/99).

My purpose of writing this letter and spreading the information in addition to appreciation of your support for me in the past is also to promote mental and physical health of human beings by exposing them to the happy news about the proof and reality of God's existence as I learned during the moments of my inspiration from him on July 3, 1986 at the shore of the Gulf of Mexico.

I believe the information will promote the power of understanding in unbiased persons in order to acquire faith and healing (ایمان و شفای). The results after subsiding the initial turmoil will gradually create harmony, health and happiness and above all may enable one to discover the mere truth, divine and true moral values for himself or herself. Also they may discover that some of these values may differ from the fundamentalists' beliefs and ideas which have been perpetuated through generations into us, mixed with superstitions and prejudice.

It may be true that as you have brought to my attention in your letter dated 3/13/98, some of the Judeo-Christian as well as Moslem and other presently existing jealous religious groups may attach any attempt to spread the honor and promote the perception of the reality of these new modern progressive ideologies, but there is no doubt in my mind that after all the facts are revealed and the truth are understood, there will be no unbiased, open minded intellectual believer in God who can resist to accept the reality of God's religion as a joyful fact which will be the guide of his/her future life, regardless that he or she may believe or disbelieve the reality of inspiration that I had from God. Nevertheless I do believe that if they perceive the reality of the event, their perception would lead them toward further inner peace, spiritual growth, as well as joy, liberty and freedom within the civilizations which have been planned, developed, arose and their courses have been influenced, determined and structured by God. In such civilization peace, health, and happiness may be endowed to all individuals even though they may not be (and do not have to be) equal in thoughts, in deed, and in words. They may not have equal mental, physical and spiritual capacity and capabilities also may not have equal desire, equal character, equal beliefs or similar moral values. As a matter of fact I do expect and believe that in a near future, many of the presently existing religious groups will discover the Religion of God and its philosophies as a modern doctrine that can be considered to be the core and common denominator of all other religions, so it can be used as a positive and effective force to unify all religions. Furthermore, this religion (of God) together with my theories when fully understood does unify science, psychology and religions. It is clear that the way of this grand unification has been a knowledge that all the intellectual thinkers and great philosophers desired to learn and struggled to discover from the beginning of civilization. Certainly these modern progressive ideologies would be very beneficial for resolving and eliminating the animosities that have been perpetuated through history. So it has a potential power to lead human beings closer to peace, harmony, health and happiness. Not only that, I honestly believe that the information of the scientific theoretical aspects of my articles will become a strong stimulus to motivate some of the unbiased atheists and many of the sincere agnostics to find a ground to land in order to discover a new opportunity to study and reevaluate their beliefs. They will have a chance to think freely with conscience, debate honestly with logic and proper reasoning about the events versus their ideologies, also about the scientific explanation of nature and God's existence. If they do so they may surprisingly discover that the divine nature, its power, its values and its beauties as well as its potential forces for evolution would flash into them to open their minds for possibly allowing the light of faith and the intelligence of divine enter into their darkness of skepticism, cynicism and nihilism which are now occupying many societies. When this happened the event will interconnect the deepest inner core of their subconscious mind within us and the highest level of their conscious and superconscious minds in the heavens. (Both these layers are formed purely from God; beyond them are black holes) The character and personality of the human beings are formed between these two levels of subconscious and super conscious mind. Realization of God and his power as they are, will glorify the development of personalities; blossom characters and will shine them through.

May be....., and only may be if they are lucky many of them would be able to reconsider the shields of their skepticism and break the barriers of cynicism in order to be enlightened and gain some degree of faith and healing by absorbing some of the power of God into their conscious and subconscious minds, if God allows them to do so. This will be the opportunity that may not be repeated for them in their lifetime.

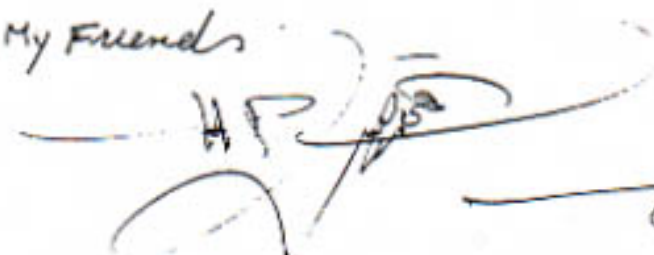

Sincerely yours,

H. Moltashemi, M.D.
